

**You're not looking for a run-of-the-mill job, but a place where you can help shape and develop software. You want to be part of a team that's technically strong and close-knit.**

This is us: a young, successful, dynamic and independent company specialising in professional IT solutions in the fields of ERP, CRM and MIS. With a team of around 20 staff, we support over 80 clients. We rely on standard products ranging from Microsoft Dynamics to Business Central, as well as bespoke software development. We guide our clients through the digital transformation process whilst optimising their business processes. We are looking for talented individuals as well as experienced staff who would like to grow with us.

With us, you'll find an employer that offers flexible and progressive ways of working. Please send your application documents in PDF format to [personal@aventit.com](mailto:personal@aventit.com). We look forward to getting to know you.

We are looking for a member of our team to start immediately or by arrangement

## Software Developer for Microsoft Dynamics 365 C-Side / AL

### What the role involves

- Developing new modules and apps using various technologies
- Developing interfaces between Dynamics 365 and other end systems
- Development and maintenance of customer modifications
- Further development of existing applications and processes
- Preparation and execution of deployments
- Code and process documentation
- Support with customer enquiries
- Ensuring the performance, quality and security of applications
- Carrying out tests, fault analysis and bug fixing

### What we offer

- The opportunity to work independently within a motivated and close-knit team
- Modern workplace facilities, flexible working hours and the freedom to choose where you work
- Attractive terms of employment
- A friendly working atmosphere with varied and responsible tasks
- A central location (we are a 2-minute walk from Altstetten station)

### What we are looking for

- An understanding of business processes and technical interrelationships
- A structured and holistic approach to thinking and working
- You are resilient and able to maintain your focus even in stressful situations
- You are open-minded, self-reliant and enjoy being part of a team that improves together
- Completed further education in computer science (HF, FH, TS/HFT, ETH)
- Experience in software development within the field of ERP solutions (Dynamics NAV/Business Central an advantage) and/or Microsoft Power Platform

CVs from recruitment agencies will not be considered.
