

# Full-Stack Developer (.NET 10 / Angular)

Focus on Service & WebUI – with customer contact and opportunities for career development

## Who we are

Aventit AG is a young, independent and successful Swiss software company specialising in business IT solutions and bespoke software.

With over 20 employees, we serve more than 80 clients - ranging from SMEs to large enterprises. Our solutions are based on established platforms such as Microsoft Dynamics 365, Microsoft Dynamics CRM, Infor M3 and Microsoft Power BI.

In addition, we develop our own innovative products as well as bespoke web, mobile and IoT solutions, including AV.Park, AV.Dispo and AV.Thing, using modern technologies and with a clear focus on practical application.

## Your role

We are looking for a Full-Stack **Software Engineer (.NET 10 / Angular) 100%** (to start immediately or by agreement)

Focus: Service backend & WebUI.

The focus of this role is on developing service-oriented back-ends and modern web user interfaces. At the same time, we are continuing to expand our mobile and IoT capabilities - close, cross-disciplinary collaboration is strongly encouraged.

This role involves direct contact with customers:

Technical queries, clarifications and proposed solutions are sometimes discussed directly with our customers - in a pragmatic, collaborative and solution-focused manner.

## What you'll be doing with us

- Development and enhancement of scalable services and modern web user interfaces
- Technical analysis and direct coordination of requirements with clients
- Helping to shape architecture, interfaces and system landscapes
- Contributing to client projects and in-house products (e.g. AV.Park, AV.Dispo)
- Collaboration with web, mobile and IoT developers in cross-functional teams
- Working in an agile Scrum environment with a high degree of personal responsibility
- Quality assurance through clean code, testing and CI/CD

## You have experience in

- C# / .NET (LTS, currently .NET 10)
- Service and API architectures
- Angular for modern web user interfaces
- CI/CD, version control and release management
- Agile software development (Scrum)

Terms such as clean code, unit testing and CI/CD are part of your everyday work.

# Full-Stack Developer (.NET 10 / Angular)

Focus on Service & WebUI – with customer contact and opportunities for career development

## What you need to bring

- Several years' experience as a software engineer (back-end / full-stack / web)
- Enjoyment of direct customer contact and technical discussions
- Interest in cross-disciplinary collaboration (web, mobile, IoT)
- Analytical mindset, team spirit and commitment to quality
- Good command of German and English (minimum B2 level)

## Development & Outlook

This role is not limited to software development alone:

- There is scope for progression into team or project management
- Technical leadership responsibilities can be taken on alongside development work
- We actively encourage individual career paths – whether in architecture, a lead role, mobile, IoT or project management

## Why Aventit?

- A high degree of personal responsibility and creative freedom
- Technologically exciting projects with a real business impact
- Modern infrastructure, flexible working hours and location
- An open, collegial company culture free from corporate bureaucracy
- Central location: a 5-minute walk from Zurich-Altstetten station

## Interested?

Then we look forward to receiving your application!
